

CLAIMS

What is claimed is:

Sub. a2> 1. A gaming machine of the type useable to provide cashless gaming, the gaming machine comprising in combination:

A. a gaming unit having a game interface, a game processor in communication with the game interface, and a cash transaction unit in communication with the game processor; and

B. a cash emulation processor intermediate, and in communication with, the game processor and cash transaction unit, the cash emulation unit having a cashless credit system, whereby the emulation processor may emulate at least a portion of the cash transaction unit and thereby receive credit information from, or provide credit information to, the cashless credit system.
